

Perspective Drawing

Assignment:

Using 1 or 2 point perspective, draw a minimum of 6 different forms / ideas on your picture plane showing depth in your picture.

Keep in mind some things of atmospheric perspective... warm colors tend to come forward whereas cool colors tend to recede or look farther away. Also the further away objects are, the less detail they will have. Be creative what else can you do with the elements of art: line, shape, color, value, texture, form and space.
